***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: the closest prior art reference of record is the patent to Tock. However, Tock does not teach or suggest the features of operating a computer for data structures in a set of data structures, as unloaded data structures are needed during runtime, storing constants from the data structure in a second portion of the second memory if and only if the respective constant has not been stored in the second portion of the second memory, as specified in claims 1 and 9. Also, Tock does not teach or suggest the features of a computer system comprising a first logic that, after a virtual machine has been started, for classes in a set of classes, receives a class from a class file, the class including one or more methods and one or more constants that store constants from the class in a second portion of memory if and only if the respective constant has not been stored in the second portion of memory, as indicated in claim 16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
